

Yeabtsega Tesfaye

Software Engineering Student | Full-Stack Web Developer

yeabtsega.tesfaye@wldu.edu.et • +251 91 460 2982 • GitHub • LinkedIn • Portfolio

SUMMARY

Software Engineering student at Woldia University with a strong academic record (CGPA: 3.94/4.00) and hands-on experience building full-stack web applications with React, Next.js, TypeScript, Node.js, Prisma, PostgreSQL, and MongoDB. Comfortable owning a project end to end – from data modeling and API design to polished, responsive interfaces – and collaborating through Git and GitHub. Motivated by turning real client requirements into clean, maintainable software.

TECHNICAL SKILLS

Languages	JavaScript • TypeScript • Java • C++
Frontend	React • Next.js • Tailwind CSS • HTML5 • CSS3
Backend	Node.js • Express.js
Databases	PostgreSQL • MySQL • MongoDB • Prisma ORM
Tools	Git • GitHub • Linux • VS Code • npm

EDUCATION

Bachelor of Science in Software Engineering	Expected July 2028
Woldia University	CGPA: 3.94 / 4.00

FEATURED PROJECTS

X Cafe — QR-Based Restaurant Ordering Platform	<i>Next.js • TypeScript • Prisma • PostgreSQL</i>
A full-stack ordering platform where customers scan a table QR code to browse the menu and order in real time, while staff track and update orders from a dedicated kitchen and admin dashboard. Built with a feature-based architecture, PostgreSQL/Prisma for data, and Socket.IO for live order updates.	
Ahadu Topup — Gaming Top-Up Platform	<i>React • Next.js • Node.js • Express</i>
A premium e-commerce platform for topping up online gaming credits, built for a freelance client. Designed a cinematic, animation-driven interface with GSAP and Framer Motion and a scalable product configuration system, with an order-and-manual-fulfillment workflow supporting receipt upload and admin review.	
FlowForge — AI-Powered Productivity SaaS	<i>React • Node.js • Prisma • PostgreSQL</i>
A solo-built, full-stack productivity application with AI-assisted task management (Gemini API), analytics dashboards, and a service-layer backend architecture. Deployed on Vercel with a PostgreSQL database on Neon.	

EXPERIENCE

Freelance Full-Stack Web Developer	Self-Employed
Design and build custom web applications for clients, working directly with them to scope requirements and translate them into responsive, production-ready features using React, Next.js, Node.js, and SQL/NoSQL databases. Manage each project's version history and delivery through Git and GitHub.	

ACHIEVEMENTS

Maintains a 3.94/4.00 CGPA while independently designing and shipping multiple full-stack web applications, and has developed a working proficiency in modern, production-grade React and Next.js practices through self-directed study and real client work.
